

Base Blind Corner cabinet

Carcass:

Lay sides A & I (Right & Left side panel) face down so the holes show

Insert side posts to plastic holders

The height of the pins should be 1 ¼" from the flat surface.

Attach A1 (Right side drawer panel) to piece A

B2 attaches to E (Center support panel)

Attach the following pieces to A and cam lock

Insert J (bottom panel) to the bottom of A

Attach L (Toe kick) groove up to the front left corner underneath J

F (back lower support) attaches to the back left corner underneath J

Place D (Top back panel) just under A1, grooves should align
the other F piece (back upper support) slides into the top groove of D

Next slide in H (back panel) to D and J

Now attach piece E that has B2 connected to it to F and cam lock

Then attach B (Top front support) to the top left corner above your slides, depending on which side you want your blind corner to be will decide which holes need side posts on pieces E & C

* make sure you are using the piece with the dowels pointing out for your top piece*

Once B is attached and cam locked, take piece C (Top bottom support) and attach it to A & E and cam lock

For right side drawer

Now attach I to the dowels showing and stand unit up
Attach your hinge backing and shelf supports

**Detach A1 & B2 from A & H (sliders come off ,using the black clip attached to slider
(Left side push up, Right side push down) and then pull drawer slides out until drawer side is free**

**Lay E5 (front panel) face down so the groove shows
Place a small glue line into groove and insert C3 (Bottom Panel)
Attach A1 & B2 to C3, dove tails will line up, again place a small glue line into each groove
Knock into place for a snug fit
Lastly apply D4 (back piece) to dove tails, glue, and knock into place
Let glue dry**

**Then line up drawer slides and push drawer into carcass
insert shelf (G)**

Now attach K (front cover panel) cam lock at the top and bottom

Lastly attach your hinges to your door and clip door onto hinge backings
